

PaperCut™

Simple, powerful print management

A CUSTOMER GUIDE TO PAPER CUT MF

Easy top-up printing that drives down costs in higher education

Give intuitive 'pay for print' solutions to your student body, and unprecedented savings to your finance department.

Challenge

Universities and colleges have complex print environments where students, faculty and staff bring a variety of different devices to campus. They need to print easily and securely, scan and digitize documents, and recover costs for students' print and copy jobs.

So if you have . . .

- ▶ massive print costs to reduce and recover
- ▶ students and staff who want to print from their mobile devices
- ▶ a need for digitized documents and easy integrations
- ▶ sensitive documents that need securing before, during, and after print

. . . PaperCut MF is the solution for you.

With PaperCut enabling quotas, and BYOD printing in tandem, CWRU were able to reduce faculty printing costs by as much as \$20,000 per year.

Print Room, Fab Lab, or 3D printer?

We've got you covered with a ticket management tool that makes job submission, management, billing, and delivery a breeze.

Solution

PaperCut MF delivers simpler-than-ever printing that protects student data, recovers costs, and reduces waste. Harnessing a cross-platform and vendor-neutral approach, it's the industry's go-to tool that just works – no matter your size, printers, operating systems, or BYOD devices.

1. Recover costs with 'pay for print' systems

PaperCut MF lets you allocate quotas to students and departments, enable top-ups via bank accounts and popular fund systems like PayPal, and distribute bulk prepaid print cards in offices or vending machines around campus.

You can also encourage duplex and B&W printing, send large jobs to efficient printers, and double-check if jobs should get the green light to keep costs and waste as low as possible. And why not check out your newfound savings with 80+ built-in reports?

2. Print seamlessly from any device

PaperCut with Mobility Print lets users print from anything, anytime – no extras needed. Students can install Mobility Print in minutes to print natively from any app; and Print Deploy pushes the right queues and drivers as users roam about with smartphones, Chromebooks, MacBooks, iPads, Windows laptops, and more.

3. Take digitalization to the next level

PaperCut MF's easy two-tap scanning gets rid of manual uploads to the cloud, cutting out frustration and printer lines. Scan directly to local folders, Google Drive, OneDrive, SharePoint Online, Dropbox, and many other destinations, and even make scans smart, searchable, and editeditable with OCR (optical character recognition).

4. Double down on data protection

With PaperCut MF, jobs only release when they're authenticated at the printer, drastically reducing uncollected printouts. You can also safeguard data physically and electronically with end-to-end encryption, and protect ownership with watermarks and digital signatures.

Benefit

4 ways PaperCut MF enhances the print environment at your university or college

1. Save money and the planet by holding students accountable for the costs of their prints

2. Enable printing in the world of BYOD to reduce IT's workload

3. Digitize documents with the power of OCR so PDFs are searchable, editable and all-around smart

4. Secure your printing and maintain confidentiality so you can rest at ease
